

Dear All,

Welcome to the July CSMD Newsletter. In this news letter we have news of the latest release available to download now, CSMD Advanced 1.2 along with its new portable playlist features. And for customers who like to use software at home and in live situations we are introducing an option to purchase additional licences at cheaper rates. Read on to find out more.

CSMD Advanced 1.2 (Portable Playlists):

Last week saw the release of CSMD Advanced 1.2 with its new portable playlists. The new software manages playlists slightly differently to previous versions by allow you to choose where you want to store them. This means you can store them on a separate drive or memory stick. Not only does the system store the playlist details but also creates a copy of the tracks. This means the playlists are truly portable. You can setup a playlist on one machine running CSMD Advanced 1.2 and then take it away on your memory stick or other device and plug it into another machine running CSMD Advanced 1.2. The output will be exactly the same and all settings that you have specified will remain. As always the upgrade to CSMD Advanced 1.2 is free to all existing customers who have a CSMD Advanced Keycode.

If you have already setup playlists on CSMD Advanced 1.15 or earlier you will not be able to import these easily into CSMD Advanced 1.2. We would infact recommend that you rebuild the playlists from scratch. Also at this stage the Hot Keys are not portable, this is something we are looking at for a release soon.

Other changes include improvements to the back end code to make the system more maintainable and faster to work with. We would also like to take this opportunity to remind you that CSMD and CSMD Advanced can run on Vista PC's as long as the .Net 1.1 Framework is installed. You can download this from the support section of our website. If you have any specific questions please contact the support team.

Now CSMD Advanced has Portable Playlists I need another Licence!!!

One of the key things that came out of our survey last month was the need to be able to purchase additional licences for the software at lower costs. With the development of CSMD Advanced 1.2 now seemed like a perfect time to introduce additional licences for our most popular CSMD range, then CSMD Advanced products. So if you already have a licence for CSMD Advanced you can now buy an additional one for £10. This allows you to have another installation of CSMD Advanced running elsewhere. If you are intending to use the portable playlists when we would recommend you purchase an additional licence for your PC at home etc. Goto the purchase now section of the website to find out more.

Well that's the end of another newsletter. As always we like to hear from our customers with stories of how they used CSMD, and problems they are coming up against. This way we can improve the software, and make it better for you, our users!

Until next time,

All the best.
