December 2008 Newsletter

Dear All,

Welcome to the Christmas Edition of the CSMD Newsletter. Already another year seems to have flown by, with a number of developments happening to keep CSMD up to date, and our customers happy. Surely the new year will have a lot of store for us too. In this news letter we will look back at the past 12 months, and also at our January Sale offer which is starting NOW!!!

CSMD in 2008:

January 2008 saw the release of CSMD Advanced 1.15. This was a small update, mainly to keep the software up to date and remove any bugs that had been lurking there! We also added a number of extra features which allowed you to manage your playlists more easily, and generally made the program run more smoothly. We then went on to develop CSMD Advanced 1.2 which was released after a number of BETA versions in June 2008. This was a much larger update, but still free to all existing CSMD Advanced customers. The main change in this update was giving users the ability to have portable playlists. This means that a playlist can be created on one machine, and then copied / moved to another via a network connection, USB memory stick, or external hard drive. This gave our users much more flexibility because now you could create a playlist at home, and take it to the show, knowing it would work exactly the same! Towards the end of 2008 development had begun on a number of external projects which will help benefit CSMD customers. For example WJPS are just about to launch a new support system which will include improved online help, to compliment the documentation / manuals that are already produced. The live version of this should be seen early in 2009 through the CSMD website. We also hope in 2009 to keep on top of our current development plan, and bring to you more new and exciting features.

January Sale in December!!

As I'm sure you will have noticed most stores have started their sales early, and so have we for new and existing customers. From now until the end of January 2009 you can get 25% of any purchase by using the following code:

CSMD0925

Simply enter this as the checkout when you are purchasing your copy of CSMD, or CSMD Advance and 25% will be deducted from the total price of the product.

Well that's the end of another newsletter, and another year!! As always we like to hear from our customers with stories of how they used CSMD, and problems they are coming up against. This way we can improve the software, and make it better for you, our users!

So for now Merry Christmas from all the developers and support team at WJPS, and a Happy New Year!

WJPS Team
