

Computerised Sound Mixing Desk

July 2007 News Letter

Dear All,

Welcome to CSMD's July Newsletter. This month's newsletter includes details of our latest realise CSMD Advanced 1.1. This new release is available free of charge to existing CSMD Advanced users. Read on to find out more.

CSMD Advanced 1.1 Release:

After a couple of months of development and testing we are now proud to release our latest version of CSMD Advanced. For those of you who have Beta tested the product we would like to thank you, and for everyone else please feel free to go and download a demo, or upgrade from CSMD Advanced to CSMD Advanced 1.1 free of charge. In this new release you will find a few new features, and improvements to others.

The new features include Live Playlist and Track editing, and Auto Next track. Live Playlist and Track editing allows you to edit a current track or playlist without having to re-load the list. Simply right click on the track details and choose the option to edit the playlist or track. The edit track details screen will show as normal and you can edit the details. Once these are saved the playlist will automatically re-load and jump to the track you were editing. The Auto Next track is a feature that forces the desk to start playing the next track when the current track has finished. This can be extremely useful and mean you only have to press play once to start a sequence of tracks playing.

These features are on top of the new features found in the previous version which include improvements to setting up playlists. You now have the option to add all the tracks from a folder. Each track is loaded with the default settings, but of course you can then go back and setup the advanced track details, and re-order the tracks to meet with you requirements. Following on from this we have added a playlist import / export feature. This feature is great if you currently use Windows Media Player, or any other generic audio player to run you show as you can take your track listings in an M3U format and import them directly to CSMD Advanced. Again only the default settings are set. The export feature allows you to export a whole CSMD playlist to an M3U playlist. This can be useful if you want to make a backup of the tracks. The exported playlist can be loaded in to Windows Media Player and then the tracks burnt to CD. However if you have trimmed any tracks using CSMD Advanced, or setup fades etc these will not work on the exported track. The other new feature you will find in the Beta is a playlist validator. This checks playlists tracks are valid before loading them to the desk. It checks that the track exists, that it's of the correct type, and that it loads into the system correctly. If one or more of the tracks don't validate the playlist will not be loaded, but the problems will be highlighted so that you can deal with the possible problems.

CSMD Advanced 1.1 can be downloaded from the www.csmd.co.uk now. Please read all the documentation before using the software. As well as downloading the software you can download the newest manual to accompany the software. Please also note that this software can be installed along side existing editions of the software and that if you have a CSMD Advanced Keycode you will be able to use this to unlock CSMD Advanced 1.1. If you are currently using the original version of CSMD you can upgrade for £9.99, details can be found in the offers section of this email. Finally new customers can purchase CSMD Advanced 1.1 for £29.99 from our online shop, go to www.csmd.co.uk to find out more.

If you encounter any problems when running this Software or have ideas about any features you could like to see, please don't hesitate to get in touch and let us know via support@wjps.co.uk.

CSMD and Google Checkout:

As you may realise WJPS like where possible to try and keep up to date with the latest technology, and so over the last few weeks we have been trialing Google Checkout as an additional secure payment method. Google Checkout allows you to pay for products simply using your credit or debit cards! You can find more out about Google Checkout at <http://checkout.google.com> or by visiting our web site <http://www.csmd.co.uk?PID=27>.

At this moment we do not have a fully integrated system to use Google Checkout, but by following the simple steps below you can be purchasing CSMD Products within minutes:

1. Choose the product you wish to purchase. The [Buy Now](#) pages will tell you the product codes.
2. Send an email to sales@wjps.co.uk with your name, email address and details of the product/s you wish to purchase.
3. Shortly after (Max 24 Hours) you will receive an email from us with an invoice
4. Follow the links on the invoice to pay for the product using Google Checkout
5. You will receive you Key code within the next few hours. If your product is a fully packaged product this will be shipped to you within the next 2 days. You will receive email confirmation that you payment has been accepted.

Current Offers:

Existing customers of CSMD will be able to upgrade to CSMD Advanced 1.1 for £9.99 instead of the normal upgrade price of 12.99. In order to make this saving please enter the following Discount Code when requested to do so **CSMDUP07**. Please also remember that you will be required to enter your current keycode and email address before being able to upgrade CSMD.

Removal from Mailing List:

We would like to remind everyone that if they are receiving emails from us and would rather not then you can be simply removed from our mailing lists. To be removed please email support@wjps.co.uk with Mailing List Removal as the subject and your email address. We will email you one final time to confirm that you have been removed from our mailing list.

Well that's the end of another newsletter, we hope you enjoy the latest release of the software and find that it keeps on getting better!

Until next time,

Kind Regards

WJPS Team
